### 3. General information of La Seu d'Urgell

La Seu d'Urgell is a small town located in the Spanish Pyrenees, at the confluence of Segre and Valira rivers. Urgell, the name of the city means “a place near the water”. The city is the most important of the area for its commercial activities through the history and the network connection with Andorra and France.

Regarding general data, La Seu has 12,041 inhabitants and it is 691m above the sea level.

Its strategic location and the political power of the diocese consolidated La Seu as one of the most important cities in mediaeval times. Today it is an active city, a centre for services and the cultural capital of a large area of the Pyrenees. The most emblematic monument in the city is Santa Maria Cathedral which was built in the 11st century. It is also the only Romanesque cathedral that has been preserved in Catalonia. With Parc Olympic del Segre, the Cathedral are the main attractions to visit La Seu d'Urgell.

The weather and the climate of the region are based on the Mediterranean climate. The average precipitation during the whole year is between 600 to 700mm. The average temperature for September is 17°C.

## 4. General information of the venue. Parc Olímpic del Segre.

Parc Olímpic del Segre was built in a branch of the Segre river, which was channeled after the damage caused by the exceptional flood in 1982.

The design of the white-water channels includes a system of complementary channels and mechanical conveyor belts which enable paddlers to return to their starting point without having to leave their boats. The dynamic conception of the whole facilities leads to intensive use all year round and separation of paddlers according to their levels of skill and ability.

The drop in the course is created naturally by channels that branch from the Segre river, with a gentle slope. The feeder canal, 185 m length, and mainly the flat-water canals, 650 m length and 20 m width, are set aside for training in flat water.

There are two courses, one dedicated to slalom competition and the other one for the start of Extreme Slalom where both channels merge.

The slalom course's specific features are the following:

- Length: 230 m
- Drop: 6,4 m
- Flow: 10 m<sup>3</sup>/s
- Course features: concrete bottom, banks and obstacles of natural boulders
- Spectators capacity: 5,000 people

If you want to use the course before the World Cup for training camps, the National Federation can book training slots directly at [reserves@parcolimpic.cat](mailto:reserves@parcolimpic.cat)

The free official training period will be organized from **Monday 2<sup>nd</sup> of June 2025**.

**No tents will be allowed inside the venue. The only area where is allowed to set up additional NF tents is the NF area. It is not allowed to stay there during the night.**

**It is forbidden to campsite on the NF area and in the parking area.**
