Any decision which could be voted during the Team Leader Meeting will be updated in the Competition Guide before the start of the competition.

4. Official communication channels

a. ICF Canoe Slalom events communication channels

ICF Canoe Slalom - WhatsApp group: [official link](#)

b. 2026 ICF CSL World Cup 2 Prague - Official communication channel

5. Pre-race requirements (checklist)

a. Anti-doping education program

All athletes, coaches, and support personnel must have completed the relevant anti-doping online course on the WADA Anti-Doping Education Learning platform (ADEL) corresponding to their role. The certificates showing completion should be sent by each National Federation to sue.natoli@canoeicf.sport. Previous certificates are still valid for this season. There is no need to repeat the program unless the person's role changes (e.g. athlete becoming coach).

Accreditations will not be issued until the certificates are marked off.

More information on [ICF website](#)

[Link](#) to access ADEL program

b. Entry list checking

Once the team leader arrives on the competition site, they must go to the accreditation office to check:

- the entry list per nation and notify any modifications
- the national anthem
- the national flag

c. Official training sessions requests

If any NF has a specific request concerning the official training sessions for a competition, these ones must be sent by email to the ICF Technical manager: [Manon Bocquet](#) before the numerical entries' deadline (45 days minimum prior to the event). No requests will be considered after that deadline.

The ICF team will try to answer at their best to those requests when building the official training schedule. Do not consider that a request sent is officially stated.

d. Guidelines for advertising on equipment

i. Generic guidelines

For canoe slalom boats, ICF Nation and athlete's name stickers are mandatory. Further information can be found in the [ICF guidelines for advertising trademark identification on equipment](#) document.

For Kayak Cross boats, only the Nation Sticker will be required. It has to be placed freely in a suitable place in front of the cockpit. The actual location may vary depending on the model of the boat. The Nation sticker is the same dimensions as for the Canoe Slalom boats.

ii. **!! Specific guidelines for the 2026 ICF CSL World Cup 2 Prague**

The HOC will provide an event sponsor logo sticker, which must be placed below the NOC sticker. Stickers will be distributed together with the bibs.

e. Athlete's headshot

The ICF TV will shoot a video (8s without sound) of athletes for sport presentation. Athletes, who have not yet had a video taken in the first World Cup, should attend this short shooting session (maximum 2 minutes) in their team uniform (medal ceremony uniform).

Any other athletes are welcome to update their video if they wish when the studio is open and not too busy.

For each event of the season, a specific planning will be shared and organized over the official training schedule.

f. Technical Video Service

A TVS feed download solution will be available for all events and demonstration runs.

ICF TVS manager: **Mark Abbott**

a) !! Cloud solution

The TVS cloud solution is now the only way to access the TVS files. Each NF must register on the [2026 Canoe Slalom TVS management form](#) to indicate which person from the team will get access to the Dropbox folder for downloading the videos (one person per nation, one link sent for the whole season). Teams who do not register through that form could not receive the link and they will not be able to access the TVS feed.

- To connect to the Dropbox folder, simply click on the link receive by email.
- NF TVS manager can visualize directly the videos on the Dropbox website. All the files of a run (full run and gate line cameras) are available between 60 and 90 sec after the athlete cross the finish line.
- To download the files locally on your computer, or to visualize the files online no Dropbox subscription is needed. The payment is necessary only if you want to store more than 2Gb of files on a Dropbox account.

No dedicated internet connection will be provided by the HOC. If the NF wants to secure a fast internet access locally, they have to manage their own internet access solution (4g/5G Sim card, Starlink...).

b) !! Backup solution

In case of issues using the TVS cloud solution, a backup option is available at the enquiry desk. There, the TVS managers under the supervision of the ICF TVS manager, will be able to plug their own device via a RJ45 wire and download the files needed. Keep in mind that this backup solution is limited. Access will be granted for a short period of time and the priority will be given to NF having athletes accessing to the next competition phase on that day.

For any question or assistance regarding TVS, please contact: tvsl@canoeicf.com.
